Development Experience:

Web Development Immersive Trainee (Mar '18 – Jun '18)

General Assembly (Boston, MA)

In this 12-week Web Development boot camp, I learned how to develop web applications at the professional level, using the latest environments and frameworks. As part of the course, I created 3 full stack applications including a capstone project showcasing the skills I've learned. My stack includes HTML5, CSS3, Sass, JavaScript, JQuery, Ruby on Rails, Ember, and Mongoose, to name a few.

Completed Applications:

- **Chris Sale Fan Page** – JavaScript, jQuery, Ruby/Rails, Heroku
I built this full stack application as a tribute to the Boston Red Sox pitcher using an Ajax frontend and a Ruby/Rails backend. Users can enjoy a slideshow and have full CRUD access to a Heroku database.
- **Bucket List** – Express, Mongoose, MongoDB
As part of a team, I helped build this application using an Express frontend and a Mongoose backend framework using MongoDB as the resource host.
- **Baseball Database** – JavaScript, Ruby/Rails, Heroku
This single resource application allows users access to full CRUD actions on a single resource. I used an Ajax call structure with HTML and CSS for the frontend, a Ruby/Rails as the backend and Heroku as the host database.

Other Work Experience:

IT Manager (Jan '18 – Sept '18)

Sentry Analytics LLC (Needham, MA)

Built and managed website with Wix.com development tools and responsible for all tasks in graphic design, CRM management, and technical troubleshooting.

Compliance and Customer Support (Feb '16 – Jan'17)

Blue and White Holdings (Israel)

Provided technical support and troubleshooting for customers using financial trading platforms.

Used V-lookups and pivot tables in Excel to help increase efficiency of customer support and sales teams.

Organized compliance documents to expedite new client verification.

Marketing Analyst (Dec '14 – Sept '15)

DCTL Solutions Ltd (Israel)

Designed and created live/recorded educational webinars on financial education and asset evaluation.

Advised marketing department on email campaigns using Microsoft Excel and PowerPoint.

Coding Languages Exp:

- HTML5
- CSS3
- Sass
- JavaScript
- Node
- Bootstrap
- Express
- Ajax
- JQuery
- Gulp
- Grunt
- Mongoose
- Ruby
- Ember
- MySQL/PostgreSQL
- Git (Terminal)

Currently learning...

- React, Meteor, Angular, Python, Java

Technology Exp:

- Atom
- Rails
- MongoDB
- Heroku
- GitHub
- Amazon Web Services
- Word Press
- WiX
- Salesforce
- Microsoft Office (Word, Excel, PowerPoint)
- Google Chrome (Inspector)

Certifications:

First Step Coding

Basic knowledge of Arrays, Objects, Functions, API Documentation, Basic Algorithms, Debugging, Consuming API's, High Order functions, Web Applications, HTML, CSS and JavaScript.

Education:

Bentley University ('12)

Bachelors of Science

Major/Minor: Marketing / Psychology

Coursework included Negotiations,

Marketing Research, New Product

Development, and High-Tech Product

Marketing
